

SAFE  FLEET

Driving Safety Forward™

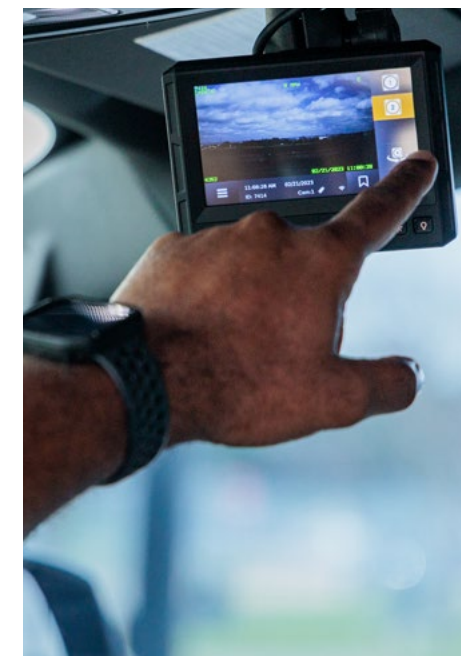

Your Trusted Partner in

Safety

CAPTURE THE EVIDENCE, SECURE THE TRUTH

What Does Patrol Ready Mean for YOUR AGENCY?

Safe Fleet Law Enforcement is changing how police departments and public safety agencies capture and manage video evidence.

We help police departments improve officer safety and efficiency while maintaining public trust with our FOCUS ecosystem of video capture and

NEXUS digital evidence management products and custom-upfit services to help your agency be "Patrol-Ready."

The Safe Fleet Law Enforcement **FOCUS® Ecosystem**

Integrated In-Car Video & Body Camera Evidence Capture Systems

The patrol vehicle is a mobile office, making it critical for officers to access, upload and manage evidence in the field.

In dangerous situations where seconds can save lives, having immediate information in the vehicle through edge computing can provide a critical advantage over slow network connections or reliance on cloud resources. That's why Safe Fleet

developed the FOCUS mobile video platform. More than a simple data recorder the FOCUS platform improves officer safety, awareness and efficiency through vehicle intelligence (VI) and provides system interoperability, device interconnectivity and user accessibility to various systems and data. Some of the applications supported by the FOCUS engine include threat detection, BOLO (vehicle identification or color, make and model) and license plate recognition.

In-the-Field Video Safety Solutions

IN-CAR VIDEO

Capture on-scene evidence for an un-biased view of events as they occur.

The FOCUS In-car Video System is an 'edge computing' inference engine, supporting Vehicle Intelligence-based (VI) applications in the vehicle for immediate notifications.

Protect Officers

Capture video of the scene to get an unbiased view of critical events.

Increase Efficiency

Capture evidence easily so officers can focus on the job at hand.

Improve Effectiveness

View critical video and audio to safeguard officers and the public.

BODY WORN CAMERAS

Capture evidence wherever an officer goes with reliable, full-shift recording for increased officer and community safety.

FOCUS body worn cameras deliver a no-compromise design that captures events as they unfold and builds trust when every second counts.

Record What Really Happened

Capture evidence before the recording is initiated. Pre-event recording is configurable for up to 120 seconds.

Increase Officer Efficiency

Capture evidence seamlessly with an intuitive design that lets officers focus on the job at hand.

Useability and Security

Trust in the most secure and encrypted evidence management available thanks to our partnership with Microsoft Azure Gov.

True Versatility

Experience full comfort with mounting options that ensure the right angle is captured, regardless of officer clothing or gear.

Foster Community Trust

Help officers maintain transparency with video and audio.

AUTOMATED LICENSE PLATE RECOGNITION (ALPR)

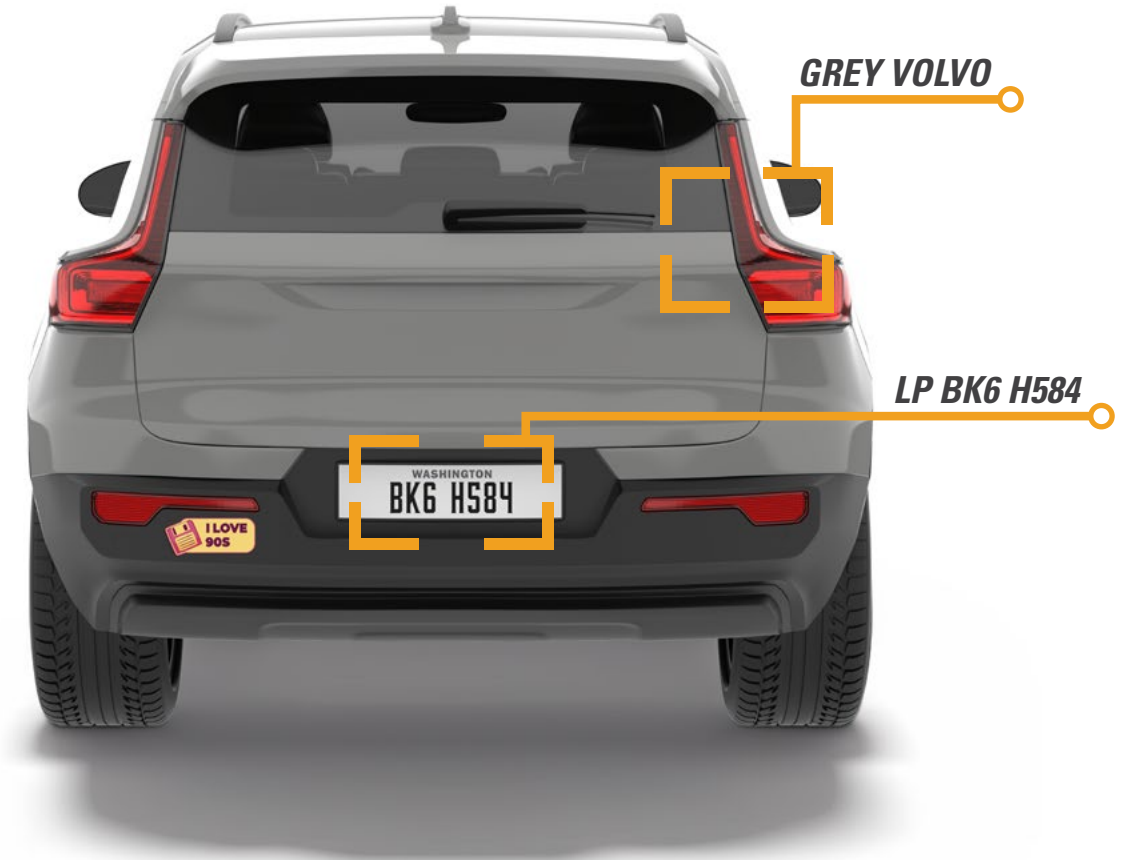

Identify criminals automatically during routine operations. Notify officers of vehicle hotlist matches as they occur for increased situational awareness, response time, decision-making and community safety.

AI object recognition and advanced analytics consistently deliver greater than 98% detection rates, even in plates that display stacked characters, state variants, color, retro-reflectivity, and damage.

The ALPR system runs in the background of an existing Safe Fleet In-Car System, making the addition of ALPR to a patrol vehicle easy. The system is rich with functionality and value-add benefits. Augmenting with ALPR capability only requires the addition of a single camera, without the need for any separate modules. This also means there is less

of a cost-impact on the agency as well by reducing auxiliary hardware and maintenance requirements. And because the system continually runs in the background, there is no officer distraction. Officers only need interact with the ALPR system when a hotlist match is made.

The Safe Fleet Automated License Plate Recognition system, a true force-multiplier, adds more eyes in the field to help officers do their jobs more efficiently and safely.

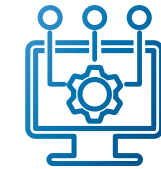

Advanced ALPR Technology
Capture license plates at highway speeds and at sharp angles across multiple lanes of traffic.

Interagency Data Sharing
Effortlessly share data with any relevant local and national law enforcement agency.

Instant Alerts
Make every second count by alerting officers about suspect vehicles in the area with up-to-the-minute data from APBs and Amber Alerts.

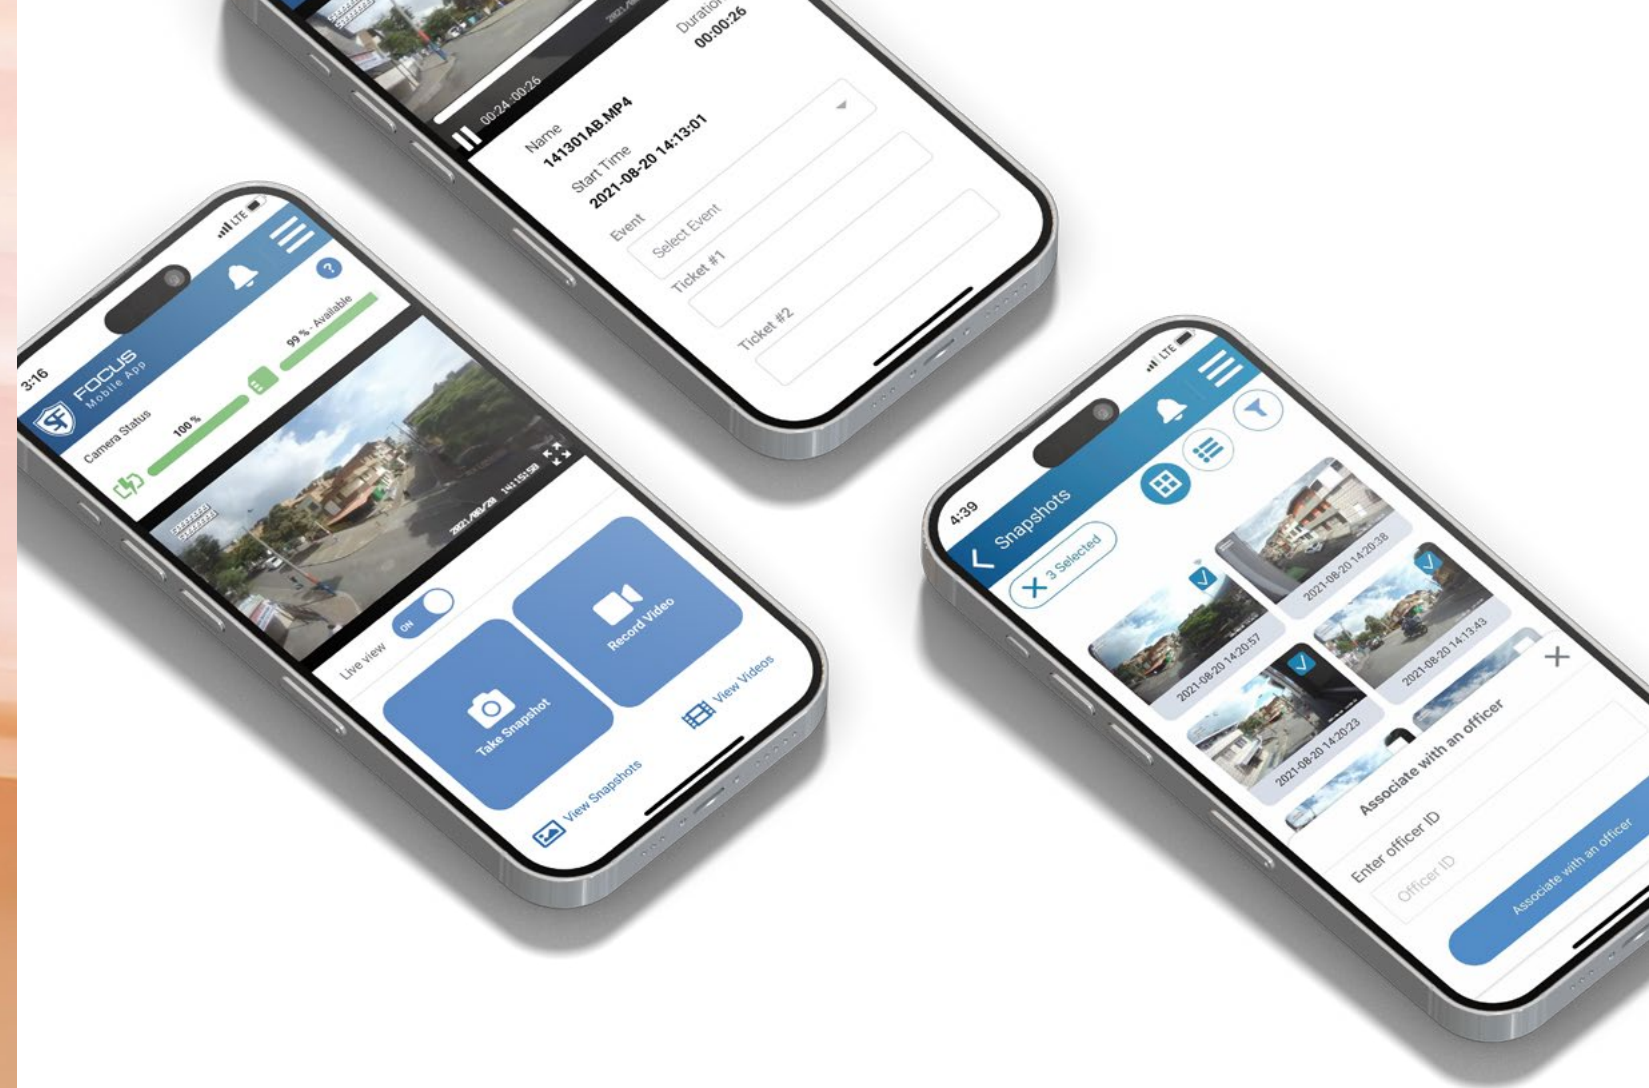

Integrated Back-Office
Enable all License Plate Recognition units to be aggregated, searched and historically analyzed.

Investigative Analytics
Identify patterns of activity and customize analytic searches whenever APBs, and Amber Alerts roll in.

FOCUS MOBILE APP

Access key body camera functionality like playback and event tagging from your mobile device for increased officer and evidence management efficiency.

Secure Video Access

View evidence captured from your body camera through phone pairing. The original footage remains securely stored on the body camera, not the phone.

Metadata

Categorize recordings by event type. Enter and edit metadata such as ticket number, case number, gender, ethnicity and driver's license based on your agency's policy.

Live View

Enable the live camera view on the mobile app to access a live feed from your body camera.

Instant Playback

Playback videos through the mobile app directly from body camera storage.

Activation Ready

Activate live recording from the mobile app to initiate recording on the body camera.

Compatibility

Available for iOS and Android devices.

DIGITAL EVIDENCE MANAGEMENT

Digital Evidence Management System

Manage digital evidence generated by body cameras, in-car and other sources as well as third-party integrations in an easy-to-use and reliable, cloud-based platform. Safeguard and protect personally identifiable information with redaction functionality and easily meet external evidence requests while maintaining security and chain-of-custody.

Years of working closely with law enforcement agencies of all sizes has resulted in the most consistently robust, back-office in the industry. Safe Fleet® Nexus™ makes managing, searching, handling and sharing digital evidence easier, safer and faster than ever before.

The Nexus digital evidence management system (DEMS), through Microsoft Azure Government's cloud service platform, helps agencies comply with public safety data management standards like CJIS and SOC2. Nexus provides full Geo-redundancy, completely mitigating the risk of lost digital evidence. It also features a very powerful

search engine that surfaces evidence with the least amount of user burden on more than 20 possible data points.

Manage your evidence in a system designed to think and work the way officers do. World-class security and compliance, intuitive workflows, incredible search functionality and depth, and seamless integrations all make managing evidence secure, easier and more insightful for today's law enforcement agencies.

Streamline Sharing

Send critical video evidence, photos, documents/reports or other digital files to people who need them quickly and reliably with Safe Fleet Courier. Files can be shared anytime, anywhere eliminating the need for burning DVDs and manual book-keeping.

Increase Productivity

Increase efficiency with integrations and enhanced functionality – including synchronization with Computer-Aided Dispatch (CAD), Active Directory (AD) and more. Relieve your agency of burdens like manual tagging of videos, managing separate credentials and assigning permissions.

Software and Firmware Updates

Stay up-to-date with the latest software and firmware updates – automatically receive the latest features, security improvements and bug fixes over-the-air through cellular, Wi-Fi or USB.

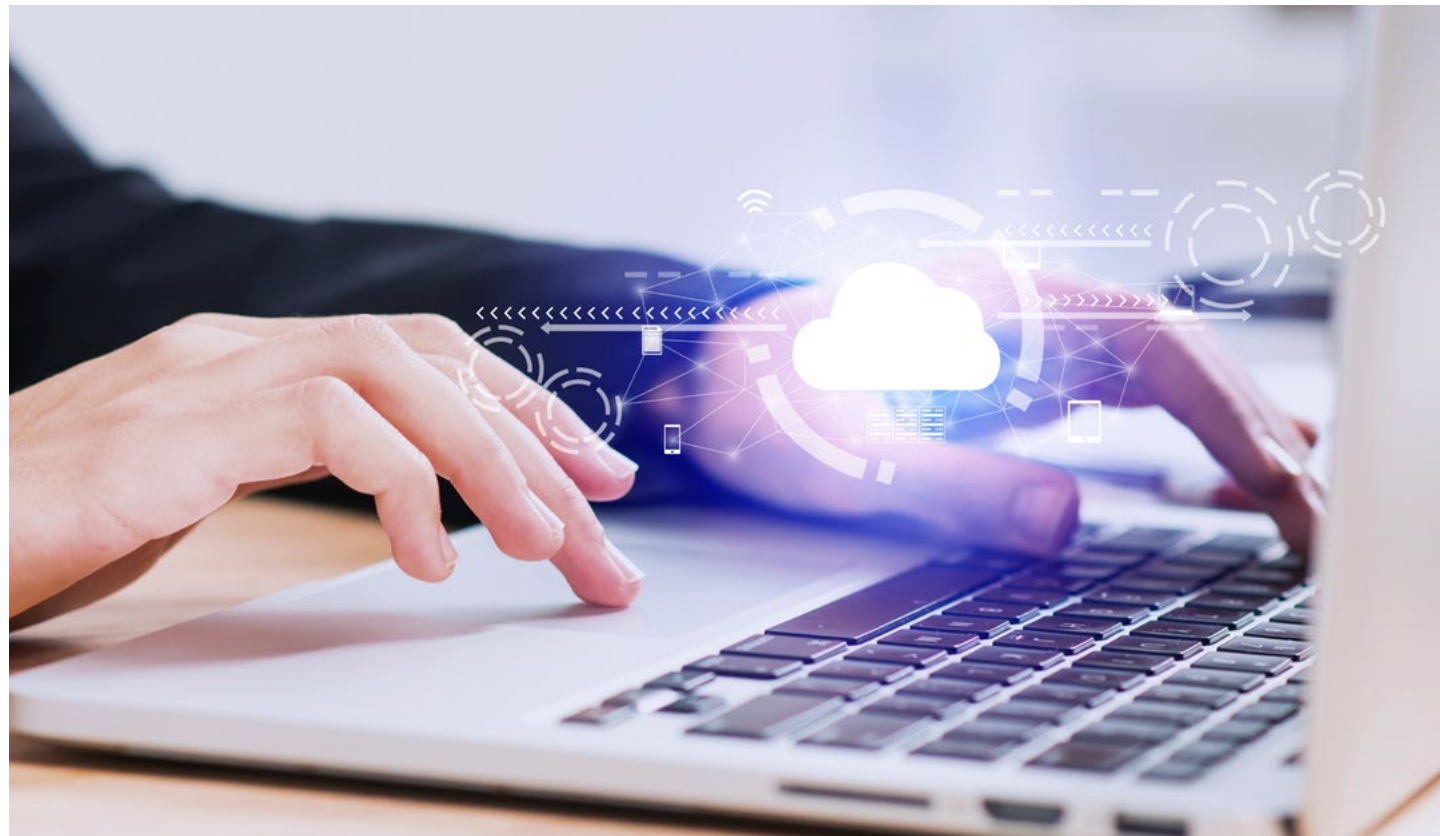

Cloud Storage

Securely manage your digital evidence with ease on a secure and scalable platform.

Access your evidence like you access your files in Dropbox. Save time, improve agency productivity, collaborate with internal and external stakeholders easily and access your evidence from anywhere.

Do all this with proven, world-class security and compliance through our partnership with Microsoft Azure Government.

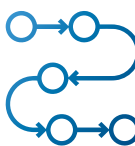

Lower Operating Costs

Cloud solutions save money by consolidating IT resources, reducing system downtime and simplifying budgets.

Unparalleled Security

Microsoft Azure Government is unrivalled at providing IT security. Your cloud storage is subject to continuous enhancements, updates and patches.

Enhanced Productivity

Upload evidence from anywhere, over cellular modems or hotspots. Administration and video access/sharing is available wherever users have an Internet connection, breaking the tether that forces users to be on the same network as the vehicle in question.

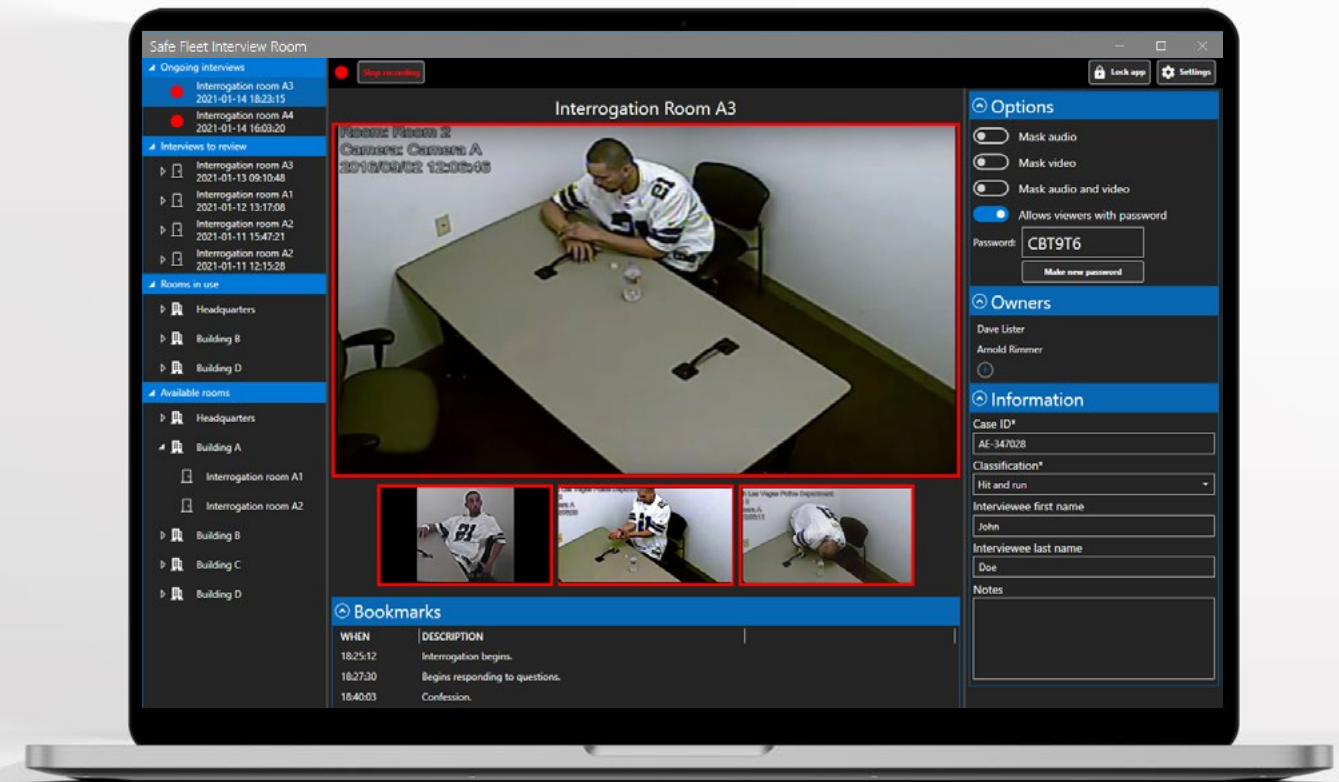

Scalability at a Moment's Notice

Increase Storage and computing capacity on-the-fly without having to retire your existing platform.

You'll Never Get Left Behind

Get automatic security and integrity updates in real-time as they become available, eliminating your need to budget for/or manage system maintenance.

Interview Room

Capture and better manage every interview for greater clarity and improved incident resolution.

Capture high quality video evidence and optimize it for greater insight. Securely live stream evidence as needed and manage audit trails and chain of custody.

Preserve the Details

Store weeks of continuous video and audio for enhanced and optimized access to evidence.

Increased Usability

Take control of the recording process with a single tap and streamline your interview workflow.

Optimize Evidence Capture

Bookmark, annotate and comment on footage in real-time for increased productivity and in-the-moment insight.

Custom Turn-key Upfit Services

Agencies rely on our systems to help them serve, protect and stay safe – regardless of the size of their fleet. That’s why we dedicate ourselves to providing consistent, reliable, and top-quality services that can’t be beat – period!

Our full one-stop, patrol-ready services include trusted vehicle upfitting of:

Emergency lighting and equipment

Prisoner containment, weapon and K-9 systems

Power management and wiring

We’ve been upfitting law enforcement vehicles for decades and have the experience and skill that comes with having hundreds of thousands of vehicle upfits under our belt. This experience translates into precision-based installation management processes that deliver uncompromised quality and performance.

Our superior workmanship drives long-lasting, value-add benefits such as:

Reduced vehicle downtime
(Well thought-out and proven, streamlined processes ensure you get your vehicles faster for increased patrol-uptime.)

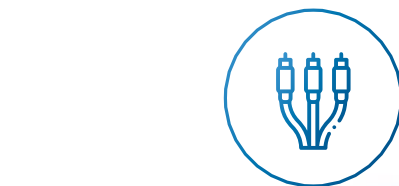

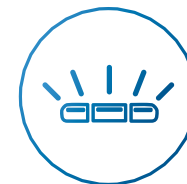

Increased vehicle serviceability
(We spend extra time making sure your upfit products are easily and individually serviceable.)

Adhering to vehicle OEM factory standards for increased vehicle warranty protection

We give each vehicle the care and attention it deserves, whether the job is large or small – complete, customized installation to make your vehicle “Ready for Patrol!”

Your Fleet, Your Operation.

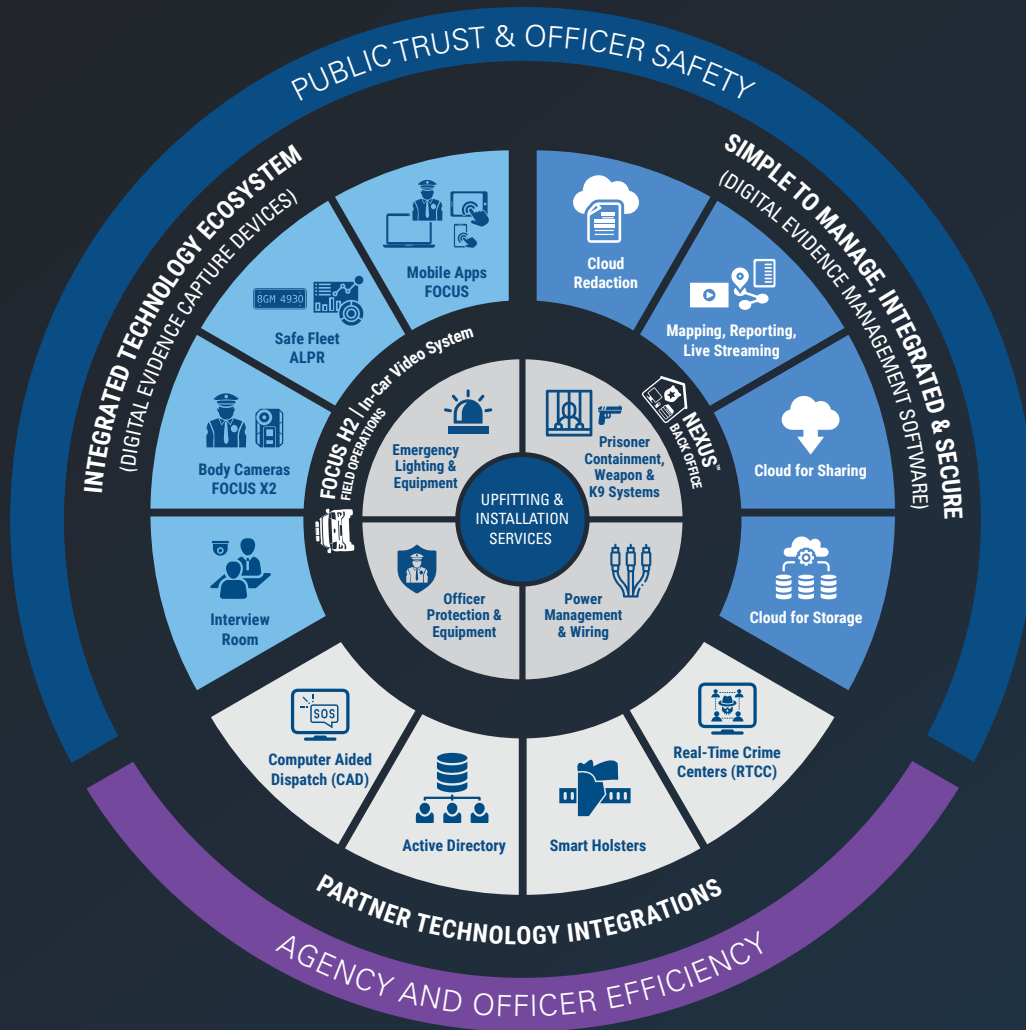

Your platform and connectivity options, meeting your needs today and tomorrow.
