

Package Delivery Routing Instructions

To better manage our company’s inbound shipments, we are requesting that you send your package deliveries to our location using FedEx parcel collect billing, **charged to the appropriate account number for each specific Safe Fleet location, shown in the chart below.**

Using FedEx parcel collect & 3rd party means that shipments to our location & items drop-shipped on our behalf will be charged directly to us & we will have proactive tracking information. Please set up this billing option change in your FedEx Ship Manager or other automated shipping system you are using.

Also, please ensure that your shipping system’s address book *exactly* matches the company name and address as shown in the chart below.

If you use FedEx Ship Manager to process your shipments, you can accomplish this by making a one-time edit to our listing in the Address Book. If you have questions on how to set up your system, call FedEx Technical Support 1-877-339-2774.

Also, please include any applicable reference #'s in future shipments.

- P.O. Number Field:
- Invoice Number Field:
- Shipment ID Number Field:

Making these system changes ensures that the appropriate Safe Fleet location receives proactive information for all packages sent to our facilities. This will help your company and ours by minimizing the time spent communicating shipment information.

We are confident that using FedEx as outlined here will help us work together more efficiently and synchronize our business transactions. If you have any questions about this request, please contact John Josephs, Global Logistics Manager, at 920-227-8279. If you need to set up a FedEx account call 1-800-463-3339 or go to www.fedex.com.
