Safe Fleet Nexus Video Management

Cloud Video Evidence Management Software

Eliminate the need to manually pull media files! Have video evidence wirelessly uploaded to you while you sit at your desk through Wi-Fi, Cellular or both for the most efficient and cost effective approach to managing video. Know the status of your surveillance system with the click of a mouse and be confident your data is entrusted to the best security measures available today.

Automatic Video Uploads

Access your video footage the minute your bus returns to coverage (Wi-Fi connectivity) or immediately after the event (cellular connectivity)

Know if Your Cameras are Recording

Get system status updates and have confidence in knowing your system will capture evidence when you need it most

Safeguard your Data

Get the best security measures available today with the same foundational back-end used to secure criminal justice information for the FBI

SAFE SF FLEET

Driving Safety Forward™

Eliminate Avoidable Risk

Not having to manually pull media files means your media remains safe and operational inside your recorder.

Simplify Evidence Management

Cloud technology centralizes video storage and management, making it easier for administrators to access and analyze footage as needed.

Enhanced Security

Nexus Video Management meets SOC 2 Type 2 and ISO 27001 Certification and is verifiable with third-party auditors.

Manage Video Hardware and Requests Easier

Simplify the management of your recorders with remote configuration and video requests wtih built-in workflows to manage large volumes of queries and the tracking of events.

Have Insight Delivered to You

Automate how you have your fleet insight delivered to you. Setup regular or one-off reports, run them as needs or on a regular schedule for up-to-date knowledge of what your fleet is doing.

Get your data when you need it. Easy. Safe. Accessible.

Fully in the cloud for enhanced access, sharing, chain of custody and security.

CLOUD STORAGE
No strain on IT Resources
Infinite Scale Options
View video evidence from anywhere from any device
No requirements to maintain or manage video server

Access Your Files How You Want to:

Cellular Connectivity	Treat all evidence like urgent evidence – **automatically get all your files now**
Wi-Fi Connectivity	**Automatically get your files when your vehicle returns to Wi-Fi coverage**
Cellular and Wi-Fi Combined Connectivity	Treat urgent evidence like urgent evidence and get those files now. And **benefit from cost savings** by accessing non-urgent evidence when your vehicle returns to the yard

Safe Fleet leads the industry in security and compliance – certified!

Third-party audits and certifications available including SOC 2 Type 2 and ISO27001.
