

# inView 360HD™

See the full Perimeter View around your Vehicle

Eliminate blind spots by giving vehicle operators a real-time 360° view around the vehicle during low speed maneuvers.

- Reduce Blind Spots
- Prevent Vehicle Damage
- Avoid Liability Costs

Prevent collisions that lead to costly vehicle repairs and increased insurance costs with this robust AVM solution.

## Supports 4, 5 or 6 Cameras

Standard system consists of a 2D, stitched 4 camera view. The system can accommodate an additional 1 to 2 cameras for larger vehicles.

## Ability to Overlay "Out-Rigger" Graphics

Help reduce risk of accidents and costly repairs with graphic "Out-Rigger" overlays for vehicles.

## Automatic Monitor Shut-Off

Monitor will automatically shut off based on predetermined vehicle speed to help minimize operator distraction.

Driving Safety Forward™

# A Fully Robust AVM Solution

Reduce risk of accidents and lower operational costs with a blind-spot reduction solution

## Enhanced Camera and Video Functionality:

- All cameras are 1080p AHD
- Supports streaming of output video to a secondary recording system
- Output video is streamed at CVBS or at VGA resolution on a set of configurable dual video output ports

## Operator Assist Features:

- Automatic switching between views (default, top, front, left, right, rear and raw camera views on channels 5 & 6)
- Automatic monitor shut-off input feed based on vehicle speed to minimize distraction to operators
- Instantaneous reverse view which automatically shows reverse view immediately after engine ignition and vehicle is shifted into reverse gear (this feature requires an AHD monitor, compliant to FMVS-111)

## System Features and Functionality

- Supports an editable vehicle library:
- Removable and lockable front ECU cover for security

## Graphical Overlays

- Graphic overlays are also available for vehicles with extrusions/equipment that may interfere with low speed maneuvers to help further reduce risk of accidents
